

Q.1) When would the destructor be called?

A: When object is set to null

B: When Garbage Collector runs

C: When we call the Dispose() method of the object

D: **When the Finalize() method is called**

Q.2) What is true about Managed Code?

A: Whole source code get converted into Native Code

B: By pointer , addresses can be checked

C: Managed Heap for Managing Memory by using GC

D: **None of these**

Q.7) How do you create a delegate that can call 2 functions in a single call?

A: **Inherit from the Multicast Delegate class**

B: use Combine method of the Delegate class

C: use the Add method of the Delegate class

D: Cannot be done

Q.8) How do you call a method asynchronously with a delegate object?

A: set the Async attribute to true

B: use the Invoke method

C: use the EndInvoke method

D: **use the BeginInvoke method**

Q.11) In order to compile a C# program from the command line, what command would you use“?

A: cmd

B: comp

C: **csc**

D: daml

Q.17) In WCF, which endpoint exposes metadata for the service?

A: IIS

B: **mex**

C: httpMetadata

D: wsMetadata

Q.18) In WCF. which binding is ideal for a method returning a void value?

A: Two way

- B: Duplex
- C: One way
- D: **httpBinding**

Q.19) The entity in Sharepoint that enable end users to modify the content, appearance, and behavior of Web pages directly from a browser.

- A: Webparts
- B: Lists
- C: Pages
- D: Sites

Q.20) The tool used to convert the textfile to resource file is

- A: **Resgen**
- B: DumpBin
- C: Aspnet\_regiis
- D: activexlmp

Q.21) If you want to move on some other page of external site , then which code will be used?

- A: Server.Transfer
- B: Server.Redirect
- C:Response.Redirect
- D:Response.Transfer

Q.22) Which control represents content page in masterpage?

- A: Content Control
- B: Table
- C: GridView
- D: **ContentPlaceHolder**

Q.23) Which class is used when we use the lock statement in C#?

- A: **Monitor**
- B: Sync
- C: Thread
- D: Interlocked

Q.24) How do you create an RCW?

- A: **using TLBEXP**
- B: using TLBIMP

- C: using REGASM
- D: using REGRCW

Q.25) Which code segment will populate a DataSet?

- A: sqlDataProvider1.Fill (dsUsers1);
- B: sqlDataProvider.Fill (dataAdapter1);
- C: sqlDataAdapter.Fill (dsUsers1);
- D: sqlDataAdapter.Fill (dataAdapter1);

Q.27) Your team creates a Web site. The Web site needs to be deployed to a staging server for performance testing. You plan to make a number of performance enhancements and then retest. You need to compile and copy the Web site to the staging server. What should you do?

- A: **Write a batch file that uses aspnet\_compiler.exe.**
- B: Write a batch file that uses InstallUtil.exe.
- C: Write a batch file that uses Csc.exe.
- D: Write a batch file that uses aspnet\_wp.exe.

Q.28) You create a Web site for a customer. You need to deploy the Web site to the customer's server without any of the source files for the Web site. You do not want the customer to be able to update any of the static pages on the Web site. Which tool should you use?

- A: **aspnet\_compiler.exe**
- B: .InstallUtil.exe
- C: CSC.exe
- D: aspnet\_wp.exe

Q.34) How many types of transport schemes are there in WCF?

- A: HTTP, TCP
- B: Peer network, IPC (Inter-Process Communication over named pipes)
- C: MSMQ
- D: **All of the above**

Q.35) Select the false statement about sharepoint workflows

- A: Sharepoint Workflow can be invoked whenever any new item is added
- B: Sharepoint Workflow can be invoked whenever any item is updated
- C: Sharepoint Workflow can be invoked manually
- D: Sharepoint Workflow can be invoked whenever any item is deleted

Q.36) If you want to add a new control on sharepoint page ,then which would be the right option?

- A: WebParts
- B: Workflows
- C: BDC
- D: Excel Services

Q.37) In Windows Communication foundation extra information service is defined using\_\_\_\_\_.

- A: Behavior
- B: Channels
- C: Message**
- D: None of above

Q.38) You wish to create a new Web service that will be expose multiple methods that are meant to work with specific user-specific data through a transaction. You decide to use ASP.NET session state to manage the user's context on the server between Web service requests. How should we define your web service?

- A: Define a class that inherits from WebServiceAttribute.
- B: Define a class that inherits from WebService
- C: Define a class that inherits from WebMethodAttribute.
- D: Do not inherit from base class. Hosting the webserice in Asp.Net is sufficient.
